

772 P

6WD Motor Grader

JOHN DEERE

MADE TO GRADE AND LEAD THE WAY

Over the past six decades, John Deere motor graders have built a reputation for outstanding machine control and effortless grading precision. The innovative ideas of our customers have lead to a legacy of industry firsts. Performance boosters enabled with standard electrohydraulic (EH) controls like exclusive automation features. The choice between dual-joystick or fingertip controls. Grade-control solutions including fully integrated SmartGrade. And a tall mainframe that smoothly shoulders large loads and clears obstacles. Its optimized machine specs, reliable capability, and updated cab amenities that put operator comfort front and center can help take your productivity to the next level.

772 P-TIER 6WD MOTOR GRADER

FEATURES

Capable control

Six-wheel drive is adjustable on the fly, enabling the 772 P-Tier to capably traverse difficult jobsite conditions. Six-wheel-drive controls are effortlessly easy to operate.

Power that checks and balances

Balanced engine horsepower, torque, and blade pull produce generous force and lugging ability, to deliver more power to the ground, easily pull through tough spots, or tackle steep hills. John Deere motor graders are designed with optimal weight distribution over each axle, for outstanding stability and grading performance.

Work your way

Armrest-mounted EH controls help minimize effort and fatigue. Opt for state-of-the-art dual-joystick or fingertip controls that mimic the conventional control pattern. A field kit allows you to easily swap between the two. A steering wheel is also included.

All about the operator

Modern cab features next-generation eight-inch touchscreen display, Automatic Temperature Control system, and centralized machine-function switches, all close at hand. Ergonomic heated/ventilated seat with adjustable armrests is designed for all-day comfort. Enhanced right-hand console tilts for convenient access and storage.

Unlimited grade control

Industry-first John Deere SmartGrade Motor Graders are fully integrated and calibrated from the factory, arriving at your jobsite ready to work. In-cylinder position sensing allows the machine to stay on grade no matter what blade pitch, articulation angle, or circle offset you're running, without the limitations imposed by masted systems.

Now you see it

High-resolution rearview camera with dedicated in-cab monitor comes standard. Optional dual front alley camera with two in-cab displays presents an overview of the street ahead, improving operator awareness.

+

**ENHANCED
OPERATOR
AMENITIES**

**FACTORY EQUIPPED
WITH OPTIONAL
SMARTGRADE™**

Beyond beacons

Optional new low-profile roof beacons enhance jobsite visibility. Optional add-on seat-belt-minder beacon is also available.

Count on cross slope

Standard cross slope maintains slopes by automatically adjusting one side of the blade while the operator controls the other. Cross slope can also be operated in “manual mode” as a slope meter. Automated cross slope simplifies holding a consistent slope by reducing operation to a single lever. Both dual-joystick controls and fingertip armrest controls come equipped with cross slope and can be easily upgraded to 3D SmartGrade.

Durable details

High-edge paint and powder-coated latches on service doors step up durability and help protect the machine exterior from wear and damage.

Uptime is everything

All daily service points, including fuel and diesel exhaust fluid (DEF), are grouped on the left side of the machine for convenient ground-level access. On the right, periodic-service points including the engine oil, hydraulic, transmission, differential, and fuel filter bank are within easy reach. Cooling package minus stacked coolers plus hinged swing-out fan simplifies core cleanout. Variable-speed hydraulically driven fan[†] runs only as fast or as often as needed, for conservation of power and fuel plus quiet operation.

[†]Standard for EPA Final Tier 4/EU Stage V; optional for EPA Tier 3/EU Stage IIIA.

Positioned for precision

Encoded sensors within the hydraulic cylinders help position them for maximum precision and force, boosting efficiency. The sensors also deliver diagnostics to catch potential system issues.

Premium circle productivity

Featuring a fully sealed bearing and pinion that run smooth and quiet, the industry-leading design of the optional premium circle reduces operating costs while delivering 40-percent more torque and 15-percent more speed than a traditional circle. The premium circle eliminates having to compensate for wear in the circle and improves accuracy when using a grade-control system — especially with John Deere SmartGrade. And greasing intervals of only four zerks every 500 hours make the premium circle easy to maintain. Durable dual-input and proven single-input circles are also available.

Bad-weather warrior

Available as a factory option, the John Deere Path mapping solution enhances efficiency and precision in snow-removal applications. Paired with SF-RTK for repeatable accuracy within one inch, operators get a better sense of road edges and boundaries in winter weather conditions.

Connected machines

John Deere construction equipment comes with in-base connectivity — free from subscriptions or annual renewals. Analyze critical machine data, track utilization, review diagnostic alerts, and more from **the John Deere Operations Center™**. The Operations Center also enables John Deere Connected Support™, which uses data from thousands of connected machines to proactively identify issues and help keep you running. With your approval, your dealer can also remotely monitor machine health, diagnose problems, and even update machine software without a trip to the jobsite.*

*Availability varies by region and product. Options not available in every country.

PUT INTELLIGENCE TO WORK

With automation features including in-base Auto-Articulation, Blade Flip, and Machine Presets, it's push-button easy to set yourself apart from your competition:

- **Auto-Articulation** lets the operator increase the maneuverability of coordinated steering and articulation while using only the joystick-steering function to steer and operate other necessary functions without manually articulating the machine.
- Use **Blade Flip** to automatically mirror the circle to a preset angle.
- Easily prepare the machine for transport with **Machine Presets**. Stow the blade and ripper, turn on the lights including the hazards, and enable Auto-Shift with one push-button press.

Add these optional automation features to further enhance machine operation:

- **Auto-Shift PLUS** allows operators to move the machine and work without having to use the inching pedal.
- **Auto-Gain for Cross Slope** automatically adjusts gain settings based on ground speed to maximize performance.
- **Machine-Damage Avoidance*** reduces the risk of blade damage to machine structures during any operation.
- **Auto-Pass*** makes grading easy by automatically placing the blade on the ground and activating the grade-control system (when equipped) at the start of the pass, then automatically raising and resetting the blade at the end of it.

*Free 500-hour demo of Machine-Damage Avoidance and Auto-Pass options not available in all countries; see your local John Deere dealer for details.

Images of equipment models may be digitally or AI generated, are for illustration purposes only, and may not reflect actual products, features, options, or attachments. Equipment availability may be limited. Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions specified per ISO 9249. No derating is required up to 3050-m (10,000 ft.) altitude. Specifications and designs are subject to change without notice and, where applicable, are in accordance with SAE standards. Unless otherwise noted, specifications are based on a unit with standard equipment; 14.0 x 610-mm (24 in.) 12 PR G2, Bias tires; and 3.66-m x 610-mm x 22-mm (12 ft. x 24 in. x 7/8 in.) high-strength, wear-resistant moldboard with 152-mm x 16-mm (6 in. x 5/8 in.) Dura-Max® through-hardened-steel cutting edges. Weights include lubricants, coolants, full fuel tank, and 79-kg (175 lb.) operator. For complete details, contact your John Deere dealer.

772 P-TIER MOTOR GRADER SPECIFICATIONS

772

P

Powertrain <i>(continued)</i>		772 P-TIER
Steering (all models include steering wheel)		All-hydraulic power-frame articulation for maneuverability and productivity; crab steering reduces side drift, positions tandems on firm ground, and increases side-slope stability; return-to-straight control included on electrohydraulic (EH)
Turning Radius (front steer and articulation)		7.21 m (284 in.) (23 ft. 8 in.)
Articulation (both right and left)		22 deg.
Final Drives		Inboard-mounted planetary sealed in cooled, filtered oil
Brakes		Foot-controlled, hydraulically operated, multiple wet-disc brakes sealed in pressurized, cooled, filtered oil; both independent systems effective on all 4 tandem wheels
Primary and Secondary Brakes		Hydraulically actuated, inboard of tandem pivot, self-adjusting, sealed in cooled and filtered oil, multi-disc (ISO 3450)
Parking Brake		Automatically spring applied, hydraulically released, oil cooled, self-adjusting (ISO 3450)
Hydraulics		
Type		Closed-center, pressure-compensated load-sensing (PCLS), variable-displacement piston pump
Maximum Pump Flow		212 L/min. (56 gpm)
Maximum System Pressure		18 961 kPa (2,750 psi)
Pump Displacement		90 cm ³ (5.5 cu. in.)
Blade Function		
All-hydraulic, industry-standard lever placement of blade-function controls; includes float position; 7 discrete saddle positions		
Blade Range		
Lift Above Ground		490 mm (19.3 in.)
Blade Side Shift (right or left)		683 mm (26.9 in.)
Pitch at Ground Line		
Forward		42 deg.
Back		5 deg.
Shoulder Reach Outside Wheels (frame straight, right or left)		2083 mm (82.0 in.) (6 ft. 10 in.)
Bank Cut Angle (right or left)		90 deg.
Blade Pull		
At Maximum Operating Weight		22 453 kg (49,500 lb.)
Electrical		
Solid-state load center and sealed-switch module		
Voltage	EPA Final Tier 4/EU Stage V	EPA Tier 3/EU Stage IIIA
Number of Batteries	24 volt	24 volt
Battery Capacity	2	2
Reserve Capacity	1,400 CCA	1,400 CCA
Amp-Hour Rating	440 min.	440 min.
Base Alternator Rating	224 amp-hour	224 amp-hour
	300 amp	130 amp
Lights	Driving lights; 2 high- and 2 low-beam halogen headlights; front and rear LED turn signals and marker lights; LED brake and hazard warning lights	
Mainframe		
Type		Welded box construction
Width (minimum)		307 mm (12.1 in.)
Height (minimum)		307 mm (12.1 in.)
Thickness		
Side		16 mm (0.63 in.)
Top and Bottom Plate		23 mm (0.89 in.)

Images of equipment models may be digitally or AI generated, are for illustration purposes only, and may not reflect actual products, features, options, or attachments. Equipment availability may be limited. Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan at test conditions specified per ISO 9249. No derating is required up to 3050-m (10,000 ft.) altitude. Specifications and designs are subject to change without notice and, where applicable, are in accordance with SAE standards. Unless otherwise noted, specifications are based on a unit with standard equipment; 14.0 x 610-mm (24 in.) 12 PR G2, Bias tires; and 3.66-m x 610-mm x 22-mm (12 ft. x 24 in. x 7/8 in.) high-strength, wear-resistant moldboard with 152-mm x 16-mm (6 in. x 5/8 in.) Dura-Max® through-hardened-steel cutting edges. Weights include lubricants, coolants, full fuel tank, and 79-kg (175 lb.) operator. For complete details, contact your John Deere dealer.

Machine Dimensions	772 P-TIER
A Height to Top of Cab	3.18 m (10 ft. 5 in.)
B Height to Top of Exhaust	3.10 m (10 ft. 2 in.)
C Height to Top of Blade-Lift Cylinders	3.05 m (10 ft. 0 in.)
D Tandem Axle Spacing	1.54 m (5 ft. 1 in.)
E Blade Base	2.57 m (8 ft. 5 in.)
F Wheelbase	6.16 m (20 ft. 3 in.)
G Overall Length	8.89 m (29 ft. 2 in.)
H Overall Length With Scarifier	9.69 m (31 ft. 9 in.)

Machine Dimensions (continued)	772 P-TIER
I Overall Length With Push Block and Ripper	9.99 m (32 ft. 9 in.)
I^I Overall Length With Scarifier and Ripper	10.59 m (34 ft. 9 in.)
Overall Length With Front-Mounted Blade and Ripper	10.60 m (34 ft. 9 in.)
J Overall Width With 14.00-R24 Tires*	2.49 m (8 ft. 2 in.)
J^I Overall Width With 17.5-R25 Tires*	2.64 m (8 ft. 8 in.)
J^{II} Overall Width 550/65R25 Tires*	2.82 m (9 ft. 3 in.)

*Also see Tires/Wheels on page 9.
