

Rugged. Reliable. Ready.

PTO-Driven Overseeder

Lush, green turf is well within your reach.

In just one pass, a Frontier multi-purpose overseeder aerates, meters seed, plus incorporates and compacts the seed to ensure successful germination. And since flat slicing knives are used in the process, there's only minimal disturbance to existing turf. The Frontier overseeder is your ticket to healthy turf, whether you work with parks, athletic fields, golf courses, or lawns.

It's versatile, too. By simply unbolting the double flanges at each end of the aeration rotor, you can install an optional tiller rotor – transforming the aerator into a primary seedbed preparation machine. You'll level, seed, and pack the bed in just one pass.

But best of all, this Frontier Overseeder is backed with a one-year warranty and by John Deere, the most trusted name in farm and landscape equipment.

For more information, talk to your local John Deere dealer, your exclusive source of Frontier Equipment.
