

75 P

Excavator

JOHN DEERE

BUILT FOR WHAT YOU DO — AND THEN SOME

When we designed the 75 P-Tier, we started with a larger, brand-new cab to keep operators comfortable. Then we combined the agility and adaptability of our smaller compact models with the productive performance and versatile capabilities of the largest excavators in our wide-ranging lineup. And we amped up engine horsepower by 17 percent compared to the previous model, added a turbocharger for improved performance at elevated altitudes, increased dig forces and hydraulic pressure, and optimized machine stability by 10 percent. With customer-inspired features like these, plus some pretty big options, this enhanced excavator can be just the right-size solution for your toughest tasks.

75 P-TIER EXCAVATOR

FEATURES

Transit authority

Reduced-tail-swing configuration enhances machine flexibility, enabling the 75 P-Tier to maneuver nimbly and work efficiently on tight and congested jobsites. Plus this go-to taskmaster transports easily, making it ideal for “dig-and-go” projects.

Modes of operation

Engine performance and hydraulic flow are optimally balanced for predictable operation. Two productivity modes allow you to choose the digging style that fits the job: **Power** delivers a balance of speed and fuel economy for normal operation, while **Economy** reduces engine speed and helps save fuel.

In control and comfortable

Ergonomically correct short-throw pilot joysticks enable smooth, precise fingertip control.

At home in the cab

All-new operator station that's more spacious than previous models features a completely new adjustable and heated air-suspension seat with armrests, comfortable air-conditioning system, and ample entry-way and legroom. Wide expanse of front and side glass, narrow front cab posts, large tinted overhead window, and numerous mirrors enable outstanding visibility. Isolated cab mounts help reduce noise and vibration.

Stay connected

New 8-inch multi-language LCD monitor equipped with Bluetooth® connectivity to phone calls and music provides intuitive access to a wealth of information and functions. Just turn and tap the rotary dial to select work mode, access operating info, check service intervals, source diagnostic codes, adjust cab temperature, and tune the radio. Handy USB port and cellphone holder make it easy to stay in touch.

Bring your work into focus

Standard LED lighting illuminates dusty and before-daylight or after-dark jobsites. Integrated into the all-new, high-resolution main monitor for optimal image quality, the standard right rear left camera system with additional LED surround lighting work together to supplement 270-degree visibility of the area around the machine, even in low-light conditions.

REDUCED-TAIL-SWING
DESIGN PROVIDES FLEXIBLE
PERFORMANCE IN TIGHT SPACES
COMPARED TO CONVENTIONAL TAIL-SWING MACHINES

Bank on these blades

Standard blade is ideal for cleanup and backfilling. It provides extra lift capacity and stability when running hydraulic hammers and other heavy-duty attachments. Optional new angle blade with float redefines earthmoving and grading.

Rugged resistance

Large idlers, rollers, and strutted links enable the undercarriage to withstand and command. Thick-plate single-sheet mainframe, box-section track frames, double-seal swing bearing, and new boom-cylinder guard deliver rock-solid durability. All structures and components are built to resist stress.

It's all right here

Large hinged doors provide easy wide-open access to service items including cooler and condenser cleanout. Remote oil-filter and filter-bank access, remote swing-bearing grease bank, generous fuel tank, and 500- and 5,000-hour engine and hydraulic oil-service intervals minimize downtime for routine maintenance. Fluid-level sight gauges are conveniently located and can be checked at a glance.

Auxiliary forces

Factory-installed standard auxiliary hydraulics with proportional control boost jobsite productivity and attachment capability. High-pressure, high-flow auxiliary hydraulic packages power the addition of a hydraulic hammer or a wide range of over 100 John Deere attachments.

Where the rubber meets the road

Optional rubber track pads let the 75 P-Tier set up and work on paved surfaces and even cross curbs without doing damage.

75 P-TIER EXCAVATOR

WIDE-OPEN ACCESS EASES ROUTINE MAINTENANCE

Work your way

Undercarriage options include sealed and lubricated chain with rubber pads or steel semi-grousers from 18- to 24-inches wide. Numerous bucket options let you spec the excavator for the way you work.

Connected machines

The 75 P-Tier Excavator arrives JDLink™ ready and connectivity capable. Via a simple dealer-installed hardware kit, you can analyze critical machine data, track utilization, review diagnostic alerts, and more from **the John Deere Operations Center™**. The Operations Center also enables **John Deere Connected Support™**, which uses data from thousands of connected machines to proactively address issues before they arise. Once you opt in, your dealer can remotely monitor machine health, diagnose problems, and even update machine software without a trip to the jobsite.*

Bucket Selection Guide* 75 P-TIER

*Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.
