Compact Track Loader

JOHN DEERE

SMALL MACHINE, SIZABLE RESULTS

When you need small equipment that can rise high, master heavy loads, and deliver impressive boom- and bucket-breakout forces, the John Deere 317 P-Tier Compact Track Loader (CTL) can be the do-it-all machine that fits the work you do. Its vertical-lift configuration, amped-up performance, and wide range of options are the result of some of the best ideas we've heard — and put into action — from users just like you. Whether you're buying your first machine or boosting the flexibility of an existing fleet, this multipurpose compact is designed to elevate your bottom line.

317 P-TIER COMPACT TRACK LOADER

FEATURES

Tread lightly

Equipped with standard 12.6-inch-wide track, the 317 P-Tier's ground pressure is only 5.5 psi. Step even more lightly with optional 15.8-inch-wide track exerting just 4.5 psi, for work in soft underfoot conditions and side-slope stability.

Unleash the beast

Exceptional pushing power and breakout force deliver the tractive effort and leverage to dig in where other machines just spin.

In the lift zone

Vertical-lift boom combines height and reach at the top of the lift path with outstanding stability. Along with a rated operating capacity of 2,125 pounds, the 317 P-Tier CTL can precisely place pallets and carry big loads.

On the move

With its small stature, this compact is easy to trailer behind a standard pickup truck using the convenient front and rear tie-downs. Narrow-track option slims the 317 P-Tier down to a maneuverable 65-inch width.

It's all about control

Electrohydraulic (EH) ISO-pattern joystick controls that allow customized machine operations based on operator preference are standard on the 317 P-Tier.

BEHIND A STANDARD
PICKUP TRUCK

Packed for productivity

Low center of gravity, 30-degree bucket rollback, optional ride control, and optional hydraulic self-leveling help keep forks loaded and buckets full. Add capacity with up to two sets of rear counterweights.

Big ideas that deliver

Large cab entryway with swing-out door, generous foot- and legroom, sealing and pressurization to minimize dust and noise, and adjustable high-back sculpted seat optimize operator comfort. Overhead panel conveniently puts machine data on the left and control switches on the right. Easy-to-read LCD monitor reveals a wealth of vital operating info and advanced diagnostics.

Seeing is believing

Clear sightlines to the cutting edge and bucket corners, above and below the lift arms, and the jobsite ahead and behind instill confidence in close quarters. Optional LED side lighting and rearview camera further enhance visibility.

Tackle the to-do list

Swing-out rear door enables easy, ground-level access to daily service checkpoints and cooling system components. Neat freaks and rental yards can appreciate the convenient cab-footwell access that helps speed cleaning.

Make the connection

Equip your CTL with your choice of over 100 available John Deere attachments to expand the flexibility of your operation. Increased auxiliary hydraulic flow and power compared to previous models boosts attachment performance. Add a snow blower, snow pusher, or angle broom to make quick work of winter's white stuff.

Safety first

Standard personal-protection features include in-cab-activated boom lock and triple-interlock system that detects the presence of the operator.

Connected machines

John Deere construction equipment comes with in-base connectivity — free from subscriptions or annual renewals. Analyze critical machine data, track utilization, review diagnostic alerts, and more from **the John Deere Operations Center™**. The Operations Center also enables John Deere Connected Support™, which uses data from thousands of connected machines to proactively address issues before they arise. With your approval, your dealer can also remotely monitor machine health, diagnose problems, and even update machine software without a trip to the jobsite.*

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at standard conditions per SAE J1349 and DIN 6270B, using No. 2-D fuel at 35 API gravity. Gross power is without cooling fan. No derating is required up to 3050-m (10,000 ft.) altitude. Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with SAE standards. Except where otherwise noted, these specifications are based on a unit with standard equipment, full fuel tank, and 79-kg (175-lb.) operator.
