Excavator

JOHN DEERE

FITS THE WAY YOU WORK

Whether you're moving up from a backhoe to an excavator as you build your business or adding an agile niche machine that's the next big thing for your fleet, the reimagined 130 P-Tier Excavator can meet your needs and exceed your expectations. Dig footings, load trucks, install utilities — you name it. With customer-inspired standards including control pattern-change valve that eases operation and fuel-shutoff lever for conserving critical resources, plus options like deluxe LED lighting package to illuminate your surroundings, this precision performer can fit in more work on a wide variety of jobsites.

130 P-TIER EXCAVATOR

FEATURES

In your comfort zone

Quiet and spacious cab features standard rearview camera for enhanced awareness. Sculpted mechanical-suspension high-back seat that slides together or independent of the joystick console helps keep operators comfortably supported.

Know as you go

Multi-language LCD monitor and rotary dial provide intuitive access to a wealth of information and functions. Just turn and tap to select work mode, access operating info, check maintenance intervals, source diagnostic codes, adjust cab temperature, and tune the radio. Plus much more.

Powerful technology

John Deere Powerwise Plus™ technology delivers on-demand power. Precise pump flow when pilot controls are metered provides reliable, fuel-efficient machine performance.

Effortless control

Ergonomically correct short-throw pilot joysticks enable smooth, precise fingertip control with less movement or effort. Push buttons in the right lever allow predictable control of auxiliary hydraulic flow for operating attachments. Optional sliding switch provides proportional speed control.

See it like never before

Integrated into the main monitor, optional right rear left camera system with additional LED surround lighting work together to supplement 270-degree visibility of the area around the machine, even in low-light conditions.

**OPTIONAL CAMERA SYSTEM
EXPANDS VISIBILITY
AROUND MACHINE**

Keep moving forward

Hydraulic single-pedal propel system is a factory-installed option that enables straight-line machine tracking without operator articulation of both hand levers and both foot pedals.

Bank on the blade

Optional blade is an ideal addition for cleanup and backfilling. It provides extra lift capacity and stability when running hydraulic hammers and other heavy-duty attachments.

Boost your leverage

When the digging gets tough, simply press the standard power-boost button on the right-hand joystick for more hydraulic muscle.

Ready for big things

Large idlers, rollers, and strutted links enable the undercarriage to withstand and command. Thick-plate single-sheet mainframe, box-section track frames, and industry-exclusive double-seal swing bearing deliver rock-solid durability. Three welded bulkheads within the boom resist torsional stress.

You'll be a fan

Highly efficient heavy-duty cooling system keeps things cool, even in tough environments or high altitudes. Cool-on-demand suction-type fan helps reduce material buildup and maintenance.

It hardly seems like work

Large fuel tank and 500- and 5,000-hour engine and hydraulic oil-service intervals decrease downtime for routine maintenance. Fluid-level sight gauges are conveniently located and can be checked at a glance.

130 P-TIER EXCAVATOR

Durable by design

Centralized lubrication at arm tip and improved front joint-bushing design relocate the grease-entry point to push contamination out from the center, simplifying routine greasing to boost joint life.

Change things up

Integrated hydraulic coupler-ready option enables efficient attachment changeovers — especially helpful for work with underground utilities.

Get attached

Two factory-installed high-pressure, high-flow auxiliary packages deliver additional hydraulic capability to power attachments. Toggle between attachments and adjust flow and pressure based on the attachment right in the monitor.

Precision Construction

This suite of construction technology delivers **Productivity Solutions** to help you get more done, more efficiently. In-base JDLink™ connectivity provides machine location, utilization data, and alerts to help you maximize productivity and efficiency. To maximize uptime and lower costs, JDLink also enables **John Deere Connected Support™**. Dealers use Expert Alerts based on data from thousands of connected machines to proactively address conditions that may otherwise likely lead to downtime. Your dealer can also monitor machine health and leverage remote diagnostics and programming capability to further diagnose problems and even update machine software without a time-consuming trip to the jobsite.*

Lift Capacities (continued)

130 P-TIER

Boldface type indicates hydraulically limited capacity; lightface type indicates stability-limited capacities, in kg (lb.). The load point is the arm tip position (bucketless), using standard counterweight, situated on firm, level, uniform supporting surface. Figures do not exceed 87 percent of hydraulic capacity or 75 percent of weight needed to tip machine.

Buckets

A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. Buckets are equipped with John Deere TK-Series Bucket Teeth standard. A variety of teeth are available through John Deere Parts. Optional side cutters add 150 mm (6 in.) to bucket widths. Capacities are SAE heaped ratings.

Bucket Selection Guide*

130 P-TIER

* Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Does not include optional equipment such as thumbs or couplers. Larger buckets may be possible when using light materials, for flat and level operations, less compacted materials, and volume loading applications such as mass-excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications, rocks, and uneven surfaces. Bucket capacity indicated is SAE heaped.
