

750 P

Dozer

JOHN DEERE

PACKED TO POWER YOUR PRODUCTIVITY

When you work in site development, roadbuilding, or aggregates, you need to get the most from your equipment and your operators. We've relied on input from real-world customers like you to design and manufacture our dozers for nearly 75 years. The John Deere 750 P-Tier features some of your best ideas, like generous horsepower, reliable systems and components, and flexible grade-control solutions that can be easily and economically upgraded. And because retaining skilled and productive operators is a priority, we've made the operating experience a main attraction of what the 750 P-Tier has to offer.

Take control in comfort

Designed to elevate operator comfort, the next-generation cab features ergonomic controls arranged to minimize hand and arm movements, advanced touchscreen displays with configurable settings, and optional automatic temperature control (ATC) system. Both the standard deluxe fabric-covered seat and optional premium leather-accented heated/ventilated seat are angled to maximize comfort when making ripping passes.

Put progress on display

Standard on electrohydraulic configurations, eight-inch touchscreen primary display reveals machine health and configurable settings plus rearview (backup) camera (if equipped). Secondary 12.8-inch display for navigating the grade-control interface is added when the machine is outfitted with SmartGrade™ Ready Including 2D Grade Control.

Be aware of what's there

To enhance awareness for confident navigation of busy work areas, optional rearview (backup) camera helps the operator see what's behind the dozer on the in-cab monitor. Optional Advanced Vision System (AVS) includes two digital cameras mounted on the exterior left and right cab-light brackets plus an additional camera mounted to the front grille that integrate with the rearview (backup) camera for a single display on a dedicated in-cab monitor.

Add it up

Even with the highest horsepower and largest blade capacity in its size class, fuel consumption remains comparable to earlier series models. Combined with its ample operating weight, the 750 P-Tier is 12-percent more productive in backfilling applications than its closest competitor.

GRADING TASKS &
LEARNING CURVES**

GRADE-MANAGEMENT SOLUTIONS

Our suite of factory-integrated grade-management technologies including standard EZ Grade and optional SmartGrade Ready Including 2D Grade Control, SmartGrade with Topcon, and SmartGrade with Leica simplify difficult grading tasks. These intuitive offerings are easy for operators of any experience level to master. All technology solutions are fully supported by the John Deere dealer network and can be efficiently upgraded as your operation evolves:

- **EZ Grade** aids operators in manually grading smooth finish passes by making small blade corrections automatically.
- **SmartGrade Ready Including 2D Grade Control** includes entry-level slope-control solutions and plug-and-play laser. Slope control assists in grading and maintaining flat, smooth, and sloping surfaces. Operators can view and set blade slope while the system automatically controls the blade to a desired slope. SmartGrade Ready also recognizes plugged-in laser receivers and activates the plug-and-play laser that enables operators to automatically control the blade to a specific slope and elevation using a rotating laser.
- Fully integrated **SmartGrade** features next-generation components and integration, enabling the highest levels of productivity and grading performance. SmartGrade is available in your choice of Topcon or Leica packages. SmartGrade enhancements for jobsites requiring tighter tolerances or with limited GNSS coverage include capabilities for integrated total-station control.
- **Electrohydraulic (EH) controls** make it easy to add the grade-control system of your choice.

Turn, turn, turn

Independent track control speeds up or slows down each side, for smooth, full-power turns. Automatic power boost helps carry big blade loads through turns.

Blade basics

Optional 161-inch-wide blade for the 750 P-Tier enables coverage of larger jobsites in fewer passes. With heavy-duty crossmembers and high-profile push beams, the outside dozer (OSD) blade option is designed for high-production performance.

Hydrostatic dynamics

The John Deere hydrostatic system simplifies operation and redefines durability. Each track has its own independent hydrostatic pump and motor, and the blade and ripper functions have their own independent hydraulic pump, allowing both transmission and hydraulic operating characteristics to be tailored to individual preference without sacrificing hydraulic speed. And heavy loads can be carried through turns and counter-rotations while the dozer is in gear or neutral.

Ready for rugged

The 750 P-Tier retains the thick sheet metal, heavy-duty mainframe, and robust c-frame-to-mainframe joint of its proven 750L predecessor. A durable heavy-duty undercarriage comes standard. Or opt for Extended Life undercarriage with SC-2™-treated bushings, a proven parts coating that delivers up to twice the wear life.

At your service

Simplified routing of the electrical and hydraulic systems is designed for reliability and ease of maintenance. Enlarged service doors provide quick access to conveniently located checkpoints and filters. Hydraulic and hydrostatic oil-change intervals extended from 2,000 to 4,000 hours help further minimize maintenance and expense.

**MAKE FEWER PASSES
ON LARGER JOBSITES
WITH OPTIONAL 161"-WIDE BLADE**

750 P-TIER DOZER

Clear the way

Factory-installed limb risers and screens allow you to put this versatile dozer to work in forestry, land-clearing, and other challenging applications.

Connected machines

John Deere construction equipment comes with in-base connectivity — free from subscriptions or annual renewals. Analyze critical machine data, track utilization, review diagnostic alerts, and more from **the John Deere Operations Center™**. The Operations Center also enables John Deere Connected Support™, which uses data from thousands of connected machines to proactively address issues before they arise. With your approval, your dealer can also remotely monitor machine health, diagnose problems, and even update machine software without a trip to the jobsite.*

* Availability varies by region and product. Options not available in every country.

750 P-TIER DOZER SPECIFICATIONS
